Re-Commencement of Commercial Production from Karjisan Field

Selan Exploration Technology Limited (Selan) is pleased to announce that it has re-commenced commercial gas sales from the Karjisan field post drilling of replacement development and new appraisal wells. The field had ceased production in October 2022.

The wells are currently under observation for assessing reservoir deliverability. We expect the production and sales operations to stabilise over the next few weeks from the field.

Brief on Karjisan Field

Karjisan field, measuring 5 sq. km, is located in Ahmedabad-Mehsana tectonic block of the Cambay Basin. The production sharing contract (PSC) was signed on 16th February 2004. This field is part of Pre-NELP small discovered field round.

The main producing reservoir zones of Karjisan field are K-III and K-IV of Kalol formation of Middle Eocene age.
